National Pipeline Mapping System

For information about pipelines operating in your area, you may contact the National Pipeline Mapping System (NPMs). This database of pipeline operators and the location of their lines was designed for local government and emergency officials to have access to contact information for pipeline companies operating in your area. Visit www.npmsa.dot.gov to request a password to access this information. If you would like to know which specific companies listed are near your address please contact our Regulatory Services Department toll free at 1-877-280-8636. Other resources may be found at Office of Pipeline Safety <http://ops.dot.gov>, the Partnership for Excellence in Pipeline Safety www.safepipelines.org or at www.pipeline101.com.

Common Ground Alliance

For more information on safe excavation go online and visit www.commongroundalliance.com.

Non-English Speaking Public Awareness Material

Federal regulations require that pipeline operators offer public awareness material in languages other than English whenever there is a significant population of non-English speaking stakeholders. If other languages are required in your area, contact our Regulatory Services Department toll free at 1-877-280-8636.

NO PURCHASE NECESSARY. A PURCHASE OR TRANSACTION WILL NOT IMPROVE YOUR CHANCES OF WINNING. Open to U.S. residents, 18 and older. Subject to additional restrictions contained in Official Rules, available at www.digtess.org. Prize: One Prize each month for the duration of promotion: \$500.00 gift card. Odds of winning depend on number of entries received each month. Void where prohibited. If you no longer desire to receive sweepstakes announcements from TESS, send a self addressed envelope to 11880 Greenville Ave, Suite 120, Dallas, TX 75243. Allow 60 days for processing. Sponsor: Texas Excavation Safety System, Dallas, TX 75243.

Go to www.digtess.org/pasurvey to take the Pipeline Safety Survey and enter for a chance to win a \$500 Wal-Mart gift card.

Based on the information in this brochure, please answer the following:

1. Was the information in our brochure helpful? Yes No

2. Do you know how to recognize a pipeline right-of-way? Yes No

3. Do you know what to do in the event of a pipeline emergency? Yes No

4. Have we been a good neighbor during the time you have been performing excavation work? Yes No

5. Has the location of our pipeline or operations caused you concern or difficulties? If yes, which company specifically? Yes No

6. Have pipeline crews notified you that they may have a person on site when you perform excavation work near their pipeline? If yes, which company specifically? Yes No

7. Have you ever used your state's One-Call system for Call Before You Dig? If yes, were you satisfied with the service? Yes No

8. What would you like for us to do better in the future? Be specific Please be company specific :

Name: _____ Phone: _____

Address: _____

City: _____

State: _____ Zip: _____

We thank you very much for your participation. Any company named in your response may respond to your questionnaire.

How to Recognize a Suspected Leak...

Using your sense of sight, smell, and sound will help you in recognizing a suspected leak.

Sight

A dense fog, mist, or white cloud. Bubbling in water and creeks or blowing dust and discolored vegetation.

Smell

Natural Gas is naturally odorless so a distinctive gaseous odor is added.

Sound

Whistling, hissing or roaring noise.

If a Leak Should Occur...

What NOT to do...

DO NOT touch, breathe, or make contact with the leak.

DO NOT light a match, turn on or off light switches, use a cell or home telephone or do anything to create a spark.

DO NOT attempt to extinguish any natural gas fire.

DO NOT attempt to operate any valves.

What to DO...

DO leave the home, building, and area of any suspected leak.

DO call 911 once safely out of the area to notify police and fire officials.

DO warn others to stay out of the area.

What to do When a Suspected Leak Occurs

1. Immediately leave the area.

2. If possible turn off any equipment being used in or near the suspected leak. Abandon any equipment being used and move upwind from the suspected leak.

3. From a safe location, call 911 or your local emergency response number and the pipeline company. Call collect, if needed, and give your name, phone number, description of the leak, and its location.

4. Warn others to stay away when possible.

5. Traffic control

6. Medical assistance

7. Evacuation or shelter in place

8. Keeping the curious away

9. Environmental protection

10. If a leak has ignited extinguish only secondary fires.

What NOT to do If You Suspect a Leak

1. Do not touch, breathe, or make contact with the leaking liquids or gas. Stay upwind if possible.

2. Do not light a match, start an engine, use a telephone, turn on or off any type of electrical switch such as a light, garage door opener, etc., or do anything that may create static or a spark.

3. Do not attempt to extinguish any pipeline fire that may start.

4. Do not drive into a leak or vapor cloud area. Automobile engines may ignite the vapors.

5. Do not attempt to operate valves.
